

# LCP- LEARNCYBER PLATFORM

TEST YOURSELF

# OUR IDEA

## Problem Statement

- Cyberattacks (phishing, malware, data theft) are rising every year.
- Most users lack basic cybersecurity knowledge.
- Professional certifications are expensive and complex for beginners.

## ◆ Our Solution → LCP

- LearnCyber Platform (LCP) is a one-stop solution for cybersecurity awareness.
  - Combines learning modules, quizzes, chatbot support, and certificates in a single platform.
- ## ◆ Why LCP?
- Beginner-friendly and accessible for students, professionals, and general users.
  - Free/affordable learning compared to expensive certifications.
  - Provides data-driven insights to track learning progress.

## ◆ Vision

“With LCP, we aim to build a safer digital world by empowering users with cybersecurity awareness.”

# TEAM MEMBERS

01.

**Project Lead / Developer**

Name-> Aatreyee Sen  
Reg Number->24BCY10122

02.

**Content Creator /  
Researcher**

Name-> Keshav Sharma  
Reg Number->24BCE11506

03.

**Data Analyst /  
Visualization Expert**

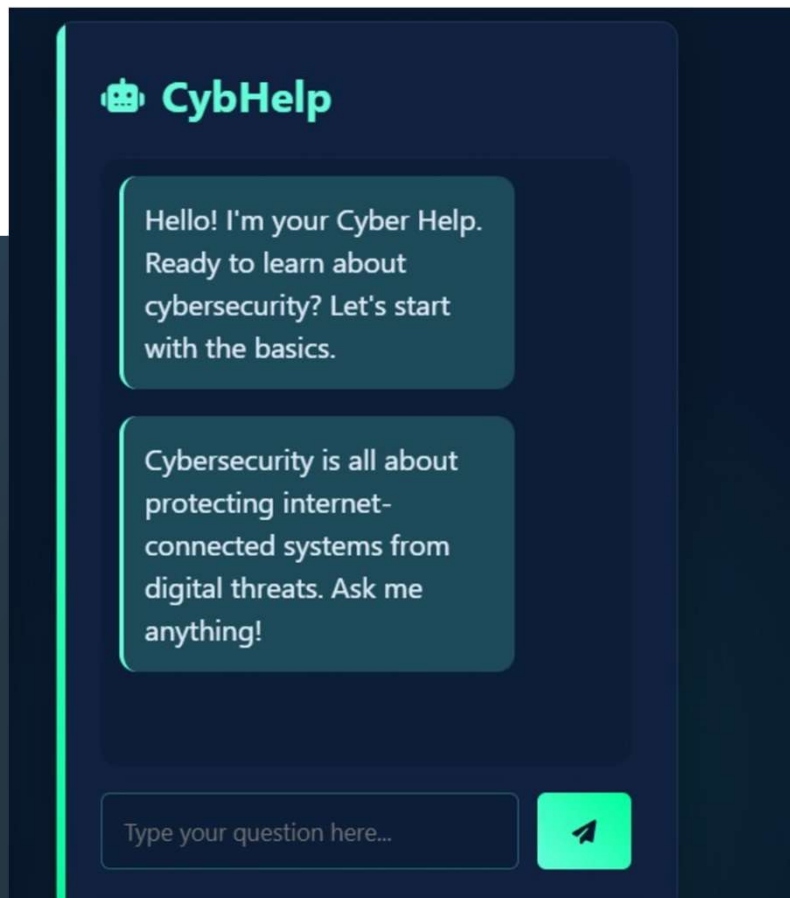

Name-> Raunak Tripathi  
Reg Number-> 24BCY10057

04.

**UI/UX Designer /  
Tester**

Name-> Aryan Gupta  
Reg Number->24BCE10435

# KEY FEATURES

**Cybersecurity Learning Modules**

**Interactive Quizzes**

**Certificates of Completion**

**AI-Powered Chatbot**

**Secure User Login & Profiles**

Guest

## Welcome to LCP- LearnCyber Platform

Master cybersecurity fundamentals through interactive lessons and quizzes.

Let's Learn

# CERTIFICATE

- A reward for completing cybersecurity quizzes successfully.
- Encourages learners to stay motivated and finish the course.

Cybersecurity is much more than an IT topic — it's a business survival essential

# CHATBOT & KEYWORDS

## Example Keywords & Responses

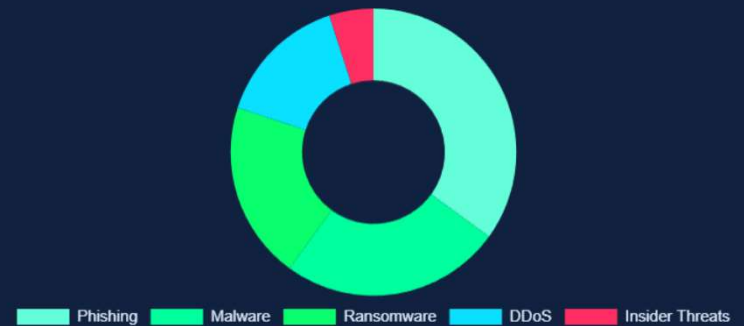

- Password
- Suggests tips for strong passwords (length, mix of characters, avoid reuse).
- Warns about common mistakes (using birthdates, names, "123456").
- Phishing
- Explains how fake emails/websites trick users.
- Gives tips to identify phishing: suspicious links, urgent messages, spelling errors.
- Malware
- Defines malware (viruses, ransomware, spyware).
- Shares prevention tips (antivirus, updates, avoid unknown downloads).

# DATA VISUALIZATION MODEL

Data transforms learning into  
measurable growth

- Data visualization helps track, measure, and improve cybersecurity learning.
- Converts quiz results and user activity into clear charts and insights.
- Makes it easier for learners (and admins) to understand progress.

Global Cyber Threat Distribution

THANK YOU  
FOR YOUR NICE ATTENTION
